

## 2021 COCKPIT WINDOW & VISOR BULLETIN (3/30/21)

Please note the updates and changes to rule 6 & 11 under **BODY** that are in red and underlined:

6. Front sun visors must not extend forward more than 9" from the front of the forward most edge of the roll cage/halo tube, and may not be wider than the width of the roll cage. Sun visors must be flat on both sides. Sun visors may not obstruct driver's vision and will be at the discretion of RUSH Officials. No side window visors; left or right.
  
11. The driver's right side opening must be a minimum of 10" vertical at any point and a minimum of 19" horizontal at any point. See Drawing 16.7.J. The left side paneling may extend to but not forward of the support bar. See Drawing 16.7.K. The use of a left side arm guard as part of the paneling is acceptable as long as it or any other part of the paneling does not prevent left-side driver entry or exit at the discretion of RUSH Officials.
